

NATIONAL PUBLIC SCHOOL, HSR, BANGALORE
Grade 12-ASSIGNMENT 3 2026 - 2027
COMPUTER SCIENCE

Instructions:-

- **The programs should be user friendly.**
- **Program should have comment at the top with given information**
 `"""Assignment3 Question1 Done By Your Name`
 `Date """`
- **Program should be documented properly with necessary comments.**
- **The program outputs should be formatted. Make a word file and copy the output screenshots.**
 Students can take the print of the sample output.

- Q1 Write menu driven python program to create a csv file (**Emp.csv**) storing the list of employee information like (ENAME, EmpID, Salary, Department) and perform given operations. The menu options are:-
- 0) reset the file
 - 1) Add more records
 - 2) Display All
 - 3) Search for a particular employee
 - 4) Display the details of all employees as per the range of salaries given by user.(example employees getting salary in the range 25000 to 42000 both inclusive)
 - 5) Sort the employee as per their salary and display all the information.
 - 6) Create a new csv file with the file name given by the user and move all the records of a particular department employees to the new file.

- Q2 Write menu driven python program to create a csv file (**Travel.csv**) storing the list of travel destination information like (PlaceName, Country , TravelCost, MiscCost) and perform given operations.

Country	Place	Travel Cost	Stay and Food Cost	Misc Cost
Switzerland	Lake Geveva	145000	12500	18000
America	Los Angeles	125000	42000	27000
Australia	Great Barrier Reef	200000	35000	16000

The menu options are:-

1. Add more rows.
2. Display All
3. Display all the records and show the total cost to visit a place.
4. Update the cost of visiting for a particular record. Input the place name from user.
5. Delete a particular record from the file.
6. Exit

For each Menu write separate functions.
